

ASIA-WIFI 802.1x authentication [asia_wifi_dot1x]

Android Setting steps

1. Goto **[Settings]**, then select item **[Network & internet]**, then select **[Wi-Fi]**.

2. Press SSID **asia_wifi_dot1x** at [Wi-Fi] frame.

3. Select or Input follow information , then press **[CONNECT]**

EAP Method	PEAP
Phase 2 authentication	MSCHAPV2
CA certificate	Select [Do not validate]
Identity	Input your Asia Network ID(ANID)
Password	ANID password

The screenshot shows the 'asia_wifi_dot1x' configuration interface. On the left, a list of settings is shown with dropdown arrows: 'EAP method' (PEAP), 'Phase 2 authentication' (MSCHAPV2), 'CA certificate' (Please select), 'Use system certificates', and 'Do not validate'. The 'CA certificate' dropdown is open, showing 'Please select', 'Use system certificates', and 'Do not validate'. On the right, the 'Do not validate' option is selected, with a warning: 'No certificate specified. Your connection will not be private.' Below this, there are input fields for 'Identity' and 'Password', a 'Show password' checkbox, and an 'Advanced options' dropdown. At the bottom right are 'CANCEL' and 'CONNECT' buttons.

4. After the setup is complete, you can choose SSID **[asia_wifi_dot1x]** to connect.
