

ASIA-WIFI 802.1x authentication [asia_wifi_dot1x]

Android Setting steps

1. Goto **[Settings]**, then select item **[Network & internet]**, then select **[Wi-Fi]**.

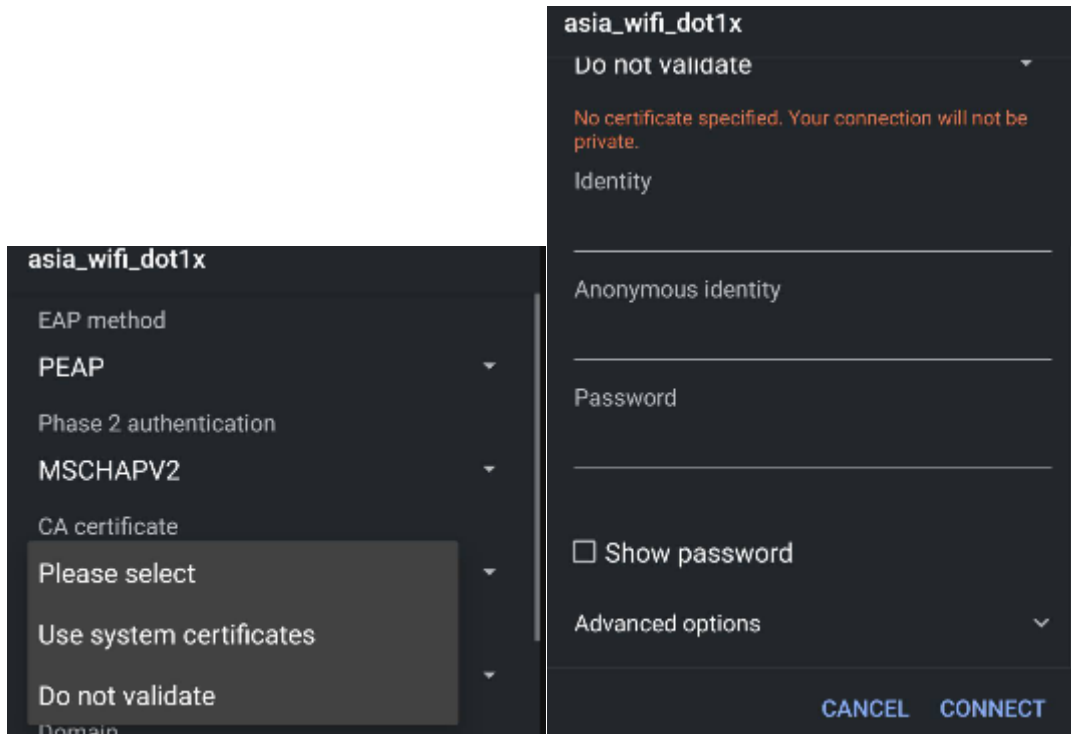

2. Press SSID **asia_wifi_dot1x** at [Wi-Fi] frame.

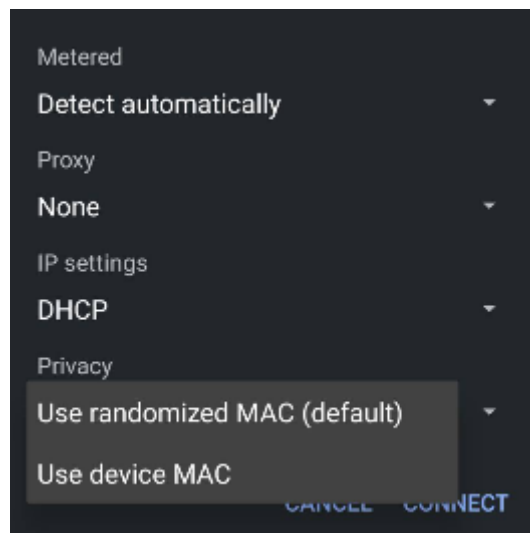

3. Select or Input follow information , then press **[CONNECT]**,

or set **[Advanced options]**. (for Android 10 later)

EAP METHOD	PEAP
PHASE 2 AUTHENTICATION	MSCHAPV2
CA certificate	Select [Do not validate] (for Android 11)
IDENTITY	Input your Asia Network ID(ANID)
PASSWORD	ANID password

4. The item set in [Privacy] is changed to use device MAC

※When using a random MAC, the system will automatically change the MAC from time to time. When the MAC is changed, re-authentication is required. During the re-authentication period, it will feel like a network interruption.

5.After the setup is complete, you can choose SSID **[asia_wifi_dot1x]** to connect.
